

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. From this point the handwriting is a different one, the spelling better, and the whole mode of keeping the accounts more clerkly. The explanation, we believe, will be found in the decease of Thomas Shuttleworth, the youngest brother, who had hitherto acted as his eldest brother's agent and steward; his place being filled, or at least his duties discharged for a short time, by the second brother, the Rev. Lawrence Shuttleworth, Rector of Witchford, Warwickshire. Here, then, is the fitting place to introduce a copy of a document, written on two leaves of foolscap, pinned together, but which was found loose within the leaves of this volume. It is endorsed —

VOLUME III.

PAYMENTS.—Sept. 1, 1594, to July 15, 1599.

RECEIPTS.—Sept. 1, 1594, to Feb. 12, 1600.

This book is not nearly so bulky as Vol. II. The payments occupy pp. 1—116, and the receipts the remainder of the volume, pp. 117—196. The extracts from it are limited to such a selection of entries as seem to throw light on prices, customs, or manners. Items recurring year after year are not repeated, lest their iteration should weary the reader. The total cessation of such items in the accounts must not be inferred from their omission here.

After the death of Sir Richard, Mr. Lawrence Shuttleworth, who succeeded to his brother's estates, seems to have immediately commenced the building of the new house of Gawthorpe Hall; and thenceforward the accounts of the chief steward seem to have been kept there.]

STEWARDS' ACCOUNTS, GAWTHORPE.

VOLUME IV.

From 1st FEBRUARY, 1599-1600, to 30th JUNE, 1601.

This is a long, thin, and narrow book, of coarse laid paper, with a hard parchment cover, containing, in 88 pages, the accounts of seventeen months. These accounts relate chiefly to the purchase of building materials, the wages of labour in getting and preparing them for use, and the wages and maintenance of the workmen in various building trades, and of their labourers, in the erection of the present edifice of Gawthorpe Hall; the first stone of which was laid (as an entry p. 23 in this volume, and another on its last page inform us) on the 26th August, 1600. There is consequently less variety in the nature of the items of expenditure than in the three former volumes. They may be ranged under a few heads; as, the mason, for getting or hewing stone in the delph, then squaring it, or rough-dressing it with the hammer, called "scappling;" and an extra charge is made for the stone prepared for the window frames, &c., of the hall; the waller also gets an inferior stone in the quarry and prepares it, and builds the walls; the wright goes to Mytton wood, or Read wood, fells the timber, squares it for beams, or saws it up for boards; and then carters, with their wains, bring both stone and timber to Gawthorpe; lime for the mortar, and also for manuring the ground around the hall, is brought from Clithero; iron, rod, bar, and other, from Halifax, and smiths are employed by the year at quarterly wages to work it up at Gawthorpe; wheelwrights are also extensively employed in

repairing the carts, and saddlers in replacing harness and other gear. In short, the volume shows the mode in which the erection of a considerable mansion was conducted at the close of the sixteenth and beginning of the seventeenth century. Such items are selected as will show prices and rates of wages for skilled and unskilled labour, and whatever else may tend to throw a light on the customs and manners of the period. The volume commences with the following heading:—

STEWARDS' ACCOUNTS.

VOLUME V.

JULY 1, 1601, to AUGUST 20, 1603.

[This book, like volume IV, is chiefly filled with disbursements on account of the building of Gawthorpe Hall; and our selected entries become consequently fewer. This is a long, narrow book, like a petty cashbook, made by stitching coarse laid paper into a parchment cover. During the two years over which its entries extend, Edward Sherborne continued to be the steward of the Rev. Lawrence Shuttleworth; and sometimes the entries were made by the principal, though for the most part by his agent. The heading to the volume, on its first page, is as follows:—]

Primo Julij, 1601; Eliz. 43.

A Boocke of Accountes of the Receptes and disbursements paid by Edward Sherburne for the use of Mr. Shuttleworthe of Gawthorpe, touching his howse ther; begyninge the firste of Julie, 1601.

STEWARDS' ACCOUNTS.

VOLUME VII.

JULY 1, 1605, TO JUNE 30, 1606.

This is a very similar volume to the last, containing the receipts and disbursements of one year in 92 pages. Most of the payments relate to the building, fitting, and furnishing of the new hall of Gawthorpe; and the difficulty in selection is to avoid iteration. A portion of the top of every leaf has been discoloured by damp or some liquid, and the writing there is quite effaced. Pages 1 and 2 contain various memoranda, amongst others the following:—

9^o Au'ste, 1605. A note of suche [? lands] in Paydyam belonging [to my M^r Laur: Shuttleworth Esq. of] Gawthorpe. Imp^ymis xx oxganges at Heigh Whitteker whereof one and a halfe the tenentes Northwood hath in occupaytion. It'm, half an oxgange at Copthurste. Towe oxganges, layt Lister landes. One oxgange and a halfe, layt Banister landes, whereof Hugh Roe and John Roe hath one oxgang betixte them in occupaytion. Tow oxganges, layt Willasall landes. Tow oxganges, layt Hadocke's landes. One oxgange, layt Cockeshot landes. Halfe an oxgange, layt Robinson landes. Fyve acar in Dubkar, layt of Marshalls oxgange. All which said oxganges were galded and payd the day and year above said towards the bildinge of the scollhowse and the new smethe at the weste end of Padyam, and layd or galded at x^s the oxgange.

Toftes in Paydyam belonge to me:—Imp^ymis Bond Yearde, now

wthot a howse, j; in Whippe Crofte, one; Bowreld Yeard, which Denby hath, j; one tofte which Lawrence Socke hath, j; [total] 4. The rest of the toftes in Padyam: — Bridgend, j; Gyles Cockeshot, j; Nycholas Hancocke, j; Hughe Halsted, j; Henry Wilkenson, j; Ric: Hargreves, j; Chamber of the Hill, j; John Whitteker, j; Ric: Wilkenson, j; thakar of the chapell, j; Fartell, j; Birtwisle Crofte, j; Barnerd Parker, j; Edm'd Whythead, j; P'iste [? Priest] Chamber, j; Black Hall, j; Bark Howse, j; s'ma tot: 22. All these were deliv'd to me by Hughe Roe, Wyll'm Houghton, and Henry Hee of No'thwood.

M'd:—That the xixth of June 1607 I receivid frome Moch Houll in syling tymber three hundrith fyve score and seven pvnchiones [punchion, a joist, or upright piece of stout timber in a wooden partition] and fyve hundreth three score and nyne panell bordes, that came furth of Ireland, and bought of Richard Stonnes, viz. ix hundreth lvj pices in all. Item the vijth of Auguste 1607, more received of the said tymber, viz. lxxj paynell bordes, and in montence [montenance, amount] viij score and xix. See all the said tymber is come from Holle.

[At page 13 is "a note of all the oxe hyed and cow hyed that were delivered to the tanner to be tanned in 1605." The first is the hide of "one branded oxe, killed, that was bought in winter." Page 15 is a list of the "Ottemeall mayd in the year 1605." Some is kiln-dried for malt; some is ground into meal; and of the rest is made "cut grottes," i.e. oats hulled or coarsely ground. Next is the "Barly mayd into malte at Gawthorppe in the year 1605." The quantity from the 20th January to the 7th June was "vj scor mettes," or 120 bushels, if met has here the ordinary signification; but it seems to have sometimes been used in these accounts as equivalent to two pecks only, or half a bushel, and in that case this half year's supply of barley malt would be 60 bushels.]

STEWARDS' ACCOUNTS.

VOLUME IX.

JULY 1, 1608, TO NOVEMBER 6, 1618.

Volume VII. of these accounts closes June 30, 1606; and it is therefore clear that Volume VIII., containing the two years between that date and the commencement of the present volume, is wanting. The present volume, which contains 202 pages, has had a few leaves cut out at the beginning, and the upper portion of some at the end torn out. From damp, or the action of some liquid, the upper portion of most of the pages is discoloured, the texture of the paper destroyed, and from ten to twenty lines, or more, utterly obliterated. In the interval since June, 1606, the Rev. Laurence Shuttleworth had died, and had been succeeded by his nephew Richard, the eldest son of his brother Thomas. Richard Shuttleworth was married, and this volume opens with house expenditure of the family in London.

[With these memoranda this volume of accounts closes, page 202. The next volume in order is lost, so that there is a hiatus of three years in the accounts, from November 1613. to November 1616. We pass therefore from vol. IX to vol. XI.]

STEWARDS' ACCOUNTS.

VOLUME XI.

NOVEMBER 5, 1616, TO OCTOBER 30, 1621.

This last volume of these old accounts is a long, narrow book of 164 pages, the parchment cover of which has become detached and lost. In the lapse of three years since the last entry in vol. IX, there seems to have been no change in principal or agent. "Ric: Shuttleworthe" still audits, allows, and signs the accounts of his steward "James Yate." Before proceeding to the ordinary entries of household expenditure, travelling expenses, and farm accounts, we must copy two long lists of the spices bought in London, one on the occasion of the lady's confinement, the other the usual proportion of spices bought in London at Michaelmas. We shall place them in juxtaposition:—

In this volume commences a weekly account of the consumption of provisions, &c., not bought, but the produce of the farm, the poultry yard, the dairy, and the brewery, and which are termed "ex proprio," or "of one's own." At the end of each month we shall bring four or five of these weekly accounts together; as showing the average weekly consumption of the household. They are usually classed under the heads of kitchen, *deyrie*, and *butterie*; and occasionally a fourth head shows the consumption of provender, &c., in the stable. The four weekly accounts, then, in the month of November, 1616, stand thus:—

1st week.—*Besydes ex proprio*.—Spent [expended, used] in the *kitchen*: One mutton, twoe pigges, foure chickens, lxiiij egges, one skate fishe, and a pecke of flower. Spent in the *deyrie*: Tenn kyne milke [the milk of ten cows], one stone et di: of butter, and twoe cheeses. Spent in the *butterie*: In w^{te} bread aighen: [eacandoles, or lumps]; in jannocks [oatenbread, in large coarse loaves] four mettes. In smale beare 3 hodgsheds; in strong beare one barrell; in candles iiij^{li}. Spent in the *stable*: [Nil.]

2nd week.—*Kitchen*: Half a veale, one mutton, vij chickens, lxxv egges, one skate fishe, and a pecke of flower. *Deyrie*: x kyne milke, one stone et quartran of butter, and one cheese. *Butterie*: W^{te} bread three aighen: jannocks, iiij metts; [the rest as in 1st week.]

3rd week.—*Kitchen*: [Same as 2nd week, save a chicken, an egg, and a skate fish less this week.] *Deyrie*: [Same as 2nd week, except] ij stone of butter and three stone of butter for the shepheard. *Butterie*: [As 2nd week, except no strong beer and] smale beare 4 hodgsheds. *Stable*: In about viij weeks, in oates lv metts.

4th week.—*Kitchen*: One mutton, one q're of veale, v chickens, 68 egges, and a pecke of flower. *Deyrie*: x kyne milk, one stone of butter, and one cheese. *Butterie*: In w^{te} bread a pecke; jannocks iiij metts; smale beare four hogsheds; strong beare one barrell, and iiij^l of candles.
